Anne,
Attached is detection results.

Thanks
Mark Rozak
Soldotna Y Chevron

I am shutting down my fuel station portion of the Soldotna y chevron. My last dump of fuel is scheduled for dec 14 2014.
I am set to have a site closure on dec 31 2014.

Mark,

This is a reminder to please send me your release detection results for all 5 tanks for the month of November by the close of business tomorrow.

Thanks,
Anne

Mark,

I have attached a copy of the ESA that was filed and mailed to you today.
As a reminder, you are required to send me passing release detection documentation for all 5 tanks for the month of November (once you have finished filling out the manual tank gauging form for Tank 5) by December 5, 2014.

Please let me if you have any questions.

Thanks,
Anne

I will have the slips for November and a full months reporting on tank 5 manual gauge report.

Thanks
Mark Rozak

Mark,

Thank you for mailing in the ESA and attaching the manual tank gauge chart for Tank 5 for the last week of October. Once I receive the ESA in the mail, I will route it for signature here, get it filed and then send you the final copy.

To be able to conclude this case, I will need one full month of passing release detection documentation for all 5 tanks. Since you don't have slips with Tank 1 for September and October, please email me a slip for November with Tanks 1-4 on it so I can document in my file that Tank 1 is now being monitored again. Once you have filled out the manual tank gauging form for Tank 5 for the entire month of November, please email me a copy of that form by December 5, 2014.

Please let me know if you have any questions.
Anne

Anne,

I mailed out an original esa signed in blue ink to you. I do not have tank 1 slips for September and October. Our up front lady somehow deleted tank one from our autostick jr veeter root system. I had a repairman come and repair it but I unfortunately do not have them for the requested months. I also have included the manual tank gauge chart for the last week of October.

Thanks,

Mark Rozak

MANUAL TANK GAUGING RECORD

Month November Year 2014
 Tank Identification Tank #5 Waste Oil
 Person Completing Form Mark Rozak
 Facility Name Soldotna Y Chevron

Circle your tank size, test duration, and weekly/monthly standards in the table below:

Tank Size	Minimum Duration Of Test	Weekly Standard (1 test)	Monthly Standard (4-test average)
up to 550 gallons	36 hours	10 gallons	5 gallons
551-1,000 gallons (when tank diameter is 64")	44 hours	9 gallons	4 gallons
551-1,000 gallons (when tank diameter is 48")	58 hours	12 gallons	6 gallons
551-1,000 gallons (also requires periodic tank tightness testing)	36 hours	13 gallons	7 gallons
1,001-2,000 gallons (also requires periodic tank tightness testing)	36 hours	26 gallons	13 gallons

Compare your weekly readings and the monthly average of the 4 weekly readings with the standards shown in the table on the left.

If the calculated change exceeds the weekly standard, the UST may be leaking. Also, the monthly average of the 4 weekly test results must be compared to the monthly standard in the same way.

If either the weekly or monthly standards have been exceeded, the UST may be leaking. As soon as possible, call your implementing agency to report the suspected leak and get further instructions.

Start Test (month, day, and time)	First Initial Stick Reading	Second Initial Stick Reading	Average Initial Reading	Initial Gallons (convert inches to gallons) [a]	End Test (month, day, and time)	First End Stick Reading	Second End Stick Reading	Average End Reading	End Gallons (convert inches to gallons) [b]	Change In Tank Volume In Gallons + or (-) [a-b]	Tank Passes Test (circle YES or NO)
